OBJECTIVES:
Improving programming skills while also getting to know new areas of knowledge.

EXPERIENCE

Accenture—Junior Analyst

July 2021 - Present

Analyze data, create and prove hypotheses, manage Excel Worksheets...

GDP — *Member*

August 2021 - Present

GDP is the [G]ame [D]evelopment [P]rogram group at UFRJ.
I'm learning to develop games using Unity Engine, composing music and implementing SFX into the games.

EJCM — *Projects Manager*

January 2021 - Present

With some scrum and agile knowledge: manage squads, prioritize and prepare sprints, keeping contact with clients, assembling the project schedule...

EJCM — *People Management Advisor*

January 2020 - Present

Organize internal surveys, organize selective processes, manage members (giving feedback, 'firing', keeping them aligned with the enterprise culture...) and manage internal documents.

EJCM — *Front-End Developer*

March 2019 - January 2020

I worked with Angular, React Native and ReactJS

Even being a Front-end I still had some contact and worked with some back-end technologies on some occasions (mostly Laravel and MySQL).

EDUCATION

UFRJ — *Computer Sciences (Ongoing)*

July 2016- Present
Transferred from Applied Mathematics.

SKILLS

Web Development (Angular, React, Laravel)

Javascript, Typescript, Python, C, PHP...

Excel(beginner VBA)

Management tools such as Pipefy, Trello, Autentique, Clockify...

mySQL

LANGUAGES

Fluent Portuguese, Advanced English, Intermediate Spanish

With the current set of classes I've taken I have notions of databases, data structures, object-oriented programming, numeric calculus, logic and some more.

UFRJ — *Applied Mathematics (incomplete)*

January 2014 - June 2016

I learned python, scientific computation and some calculus formalities.

Colégio Ipiranga — *High School*

January 2011 - December 2013

PROJECTS

Uniperiferias Website— *Front-End Developer*

I participated as mostly a Front-End Developer using Angular but also as a Back-end Developer using Laravel and MySQL.
After the conclusion of the project I also did a job as a freelancer to add a feature to the website.

uniperiferias.org

Bonus Consultoria Website — Project Manager

I managed the squad which developed the site. My duties were prioritizing and assigning sprints, keeping contact with the client but I also helped coding when necessary and deployed the site to the host service.
